

Christmas Newsletter 2018

We send you greetings with this newsletter.

We are GER-UGA, this is a working branch of inpac e. V., who sees himself as an international, charitable and social service.

We want to help young people in Uganda in the Luwero region out of poverty and to enable school education that gives them future and hope. It is help for self-help.

For this we arrange sponsorships to pay the individual school children. Because education is the way out of poverty. Unfortunately, without education and without perspective, the future of women in poverty ends up with often alcoholic men and high birth rates.

This year, we were there ourselves and met our cooperation partner, Florence Ndoodhe, who heads the CEIO (Child Education Initiative Organization) and we are friends together. We were able to visit the first donated children in each school with her. In addition, we had the great privilege to be invited by a mother of a godchild and to know the environment from which the child comes. Poverty has touched us a lot, but so has our gratitude and that unlikely warmth of the heart moves.

We also want to help the children, who are not students but are gifted with craftsmanship. For this purpose, the construction of a vocational school has been started, which is already half finished. There are about 200 children to get the opportunity, the profession, such. As the chef, the carpenter, the craftsman to learn practically and thus the necessary money for a living earn yourself.

We want to help! We want to be a multiplication factor. And you can contribute to this multiplier factor through your financial support. We can't change the whole world, but we can give these children in Luwero a future and hope now.

Every donation is guaranteed to arrive where it is most needed.

More information and current contributions offer our homepage www.ger-uga.de. You are welcome to contact me at alexander.kaisser@web.de.

A blessed Advent and Christmas wishes

Alexander Kaiser,
Work Branch Manager GER-UGA
